Special Features

1. Maximum media thickness of 50mm.
2. Ink supply system with level alarm function.
3. Automatic height adjustment - automatic detect the media thickness to adjust the carriage height.
4. Automatic correction and flatten system - avoid any shifting during printing.
5. Media registration system for both roll and rigid media.
6. Anti-crash system -prevents print heads from touching the substrate and getting damaged.
7. Led uv curing system.
8. Ionization bar - remove electro-static charges on the substrate, ensuring optimum ink droplet placement.

Expand Your Valued Business

White, color and varnish printing at the same time

White, color, and varnish are printed at the same time, and multiple colors can be printed at a time, which can enhance the gloss of the picture and enhance the vividness of colors.

White, color and varnish printing at the same time

White, color, and varnish are printed at the same time, and multiple colors can be printed at a time, which can enhance the gloss of the picture and enhance the vividness of colors.

Detail Characteristics

Stronger structure

14mm thick steel plate are used on both side of this printer,ensure the accuracy of the platform.

Ink supply system with alarming function

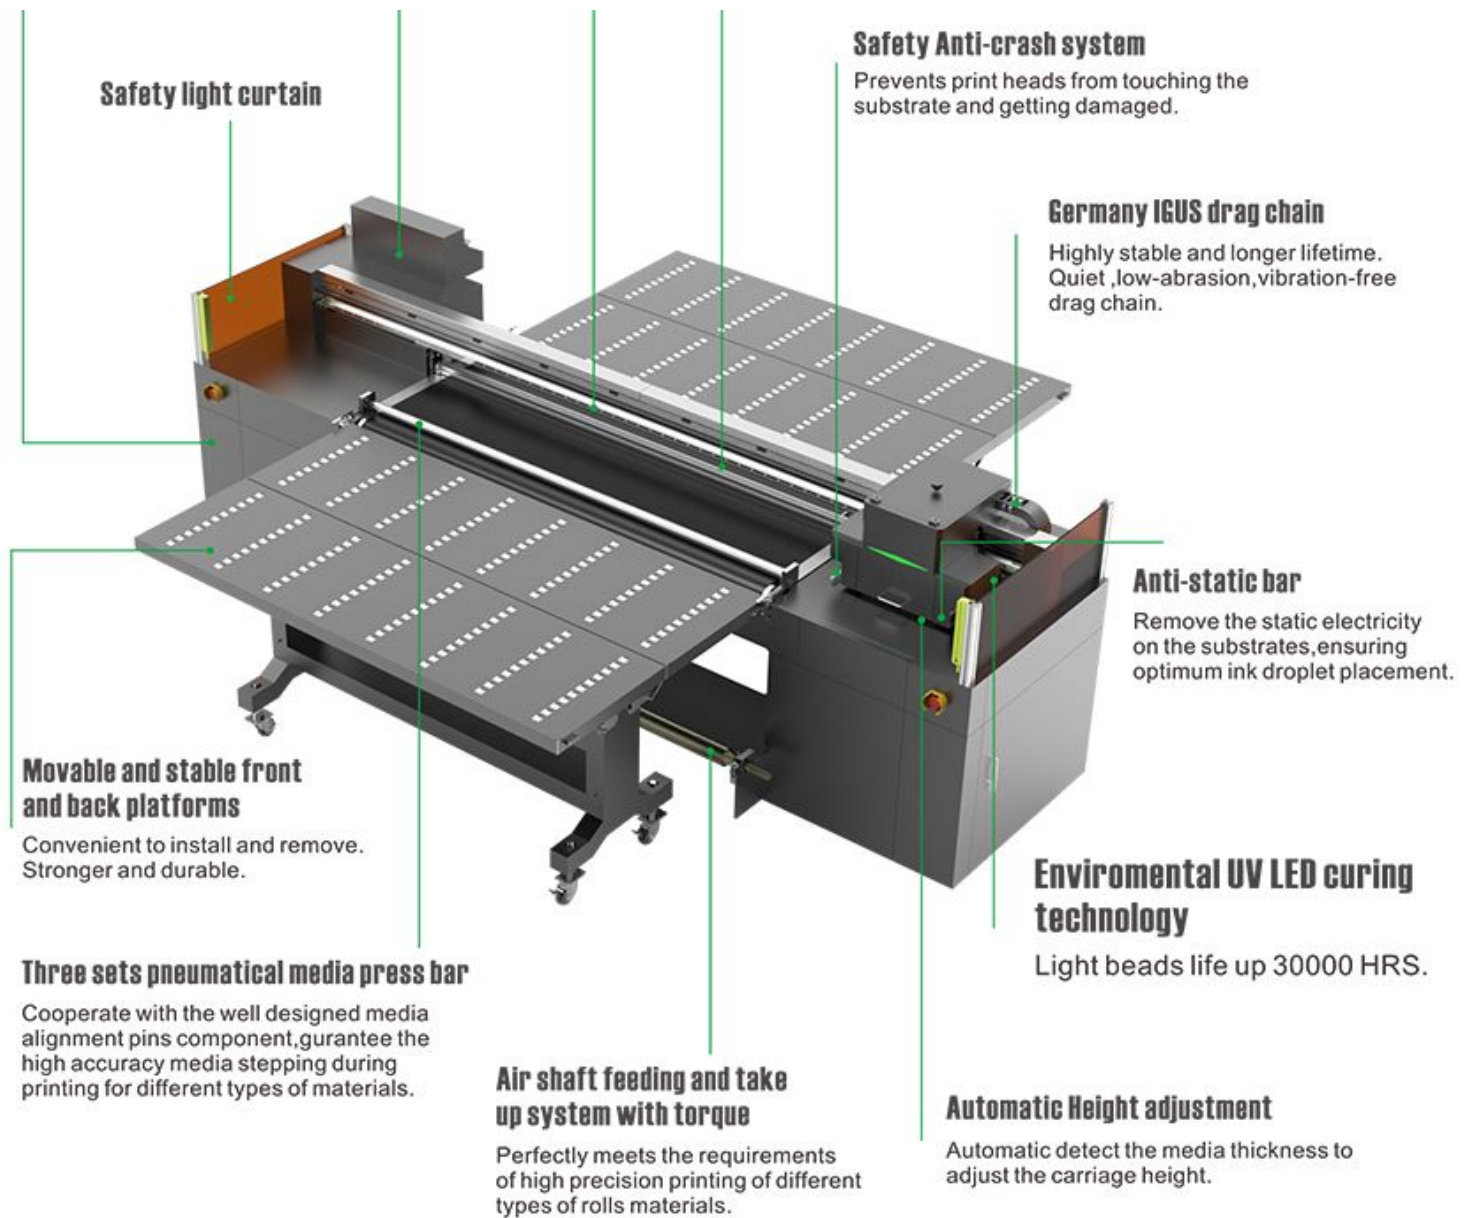

It provides stable and sustainable ink supply. When short of inks, it will alarm to remind you add inks.

Dual THK guide rail

THK 20mm guide rail make running faster and more stable, High speed and quality guarantee.

Electromagnetic levitation

High stability magnetic encoderstrip, high precision linear motor with ultra-silence.

Individual negative pressure system

Facilitate the operation of machine, guarantee the work efficiency, greatly reduce the maintenance time.

Four-stages vacuum zones

Ensure efficient hold-down, no unintended media movement, and easy transitions between jobs.

Automatic connection system

European standard electronic diagram

Automatic Correction System

Ensure high precision media feeding, even after hundreds meters of continuous printing.

on each cable are numbers and marks, makes the communications between engineers are easy and efficiently tracking and solve the problems.
